

## SPECIAL CONDITIONS FOR GUIDED BICYCLING

1. The CUA for Guided Bicycle Tours allows the CUA holder to conduct guided road-based bicycle tours in Shenandoah National Park. The use of a bicycle is prohibited except on park roads, in parking areas and routes designated for bicycle use.
2. When operating a bicycle during periods of low visibility, or while traveling through a tunnel, or between sunset and sunrise bicycles must exhibit a white light on the front and a red light on the rear of the bike. Reflectors alone do not provide adequate safety.
3. Individual rides should consist of no more than 100 cyclists. Groups should be no larger than 20 cyclists with at least a 15 minute interval between each group.
4. Support vehicles will stop only at designated parking areas except in emergency situations. The support vehicle will display company name on the side of the vehicle. The support vehicle must travel at the speed of traffic, not at the speed of the bicycle group.
5. During inclement weather, a Park Ranger may prohibit bicycles from entering onto Skyline Drive for safety purposes.
